

GLOSSARY OF TOOLBAR

Home Takes you to the Landing Page

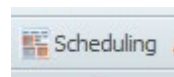

Message Centre Takes you to your Inbox

Patient List Where you create your Patient Lists

These Links allow you to access your Patients via a worklist. The one relevant to your role as shown in your Training

E.g. Care Compass - Nursing

This will allow you to view Outpatient Clinics

(Multi Patient Task List) Once a Patient List has been linked it will show all referrals awaiting action

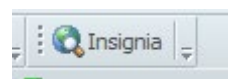

This is where Phlebotomists access requests

This is a link to Surginet (Theatres)

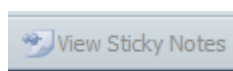

This is a link to all current User Guides

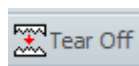

This is a link to Insignia Pacs

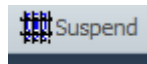

This allows you to add a note to a Patient record, This however is non-auditable so should only be used as an aid memoir

Once a sticky note has been created they can be viewed and deleted here

This will tear off a view of the record to enable you to move to another screen

Not to be used at present

This closes Powerchart

This is a clinical calculator

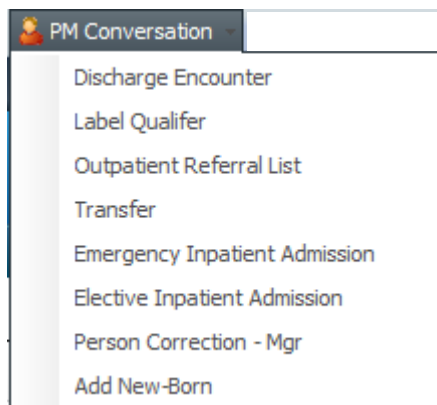

This is where all Powerforms within the system sit . Dependant on your role there should be a favourites folder set up

This is where you will administer medication from. All but IV Fluids - these are administered from the Drug Chart

This is where you go document collection of sample and print labels

This is where you can action the most common conversations within PM Office (These can still be also actioned within the PM Office Application as normal)

This takes you to Depart Procees and enables the completion of the Discharge Summary

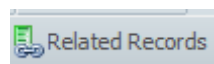

This is for internal messaging within the system

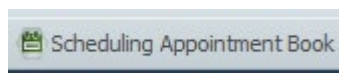

This allows you to print from the record

This is a Maternity function. It allows you to copy over details from mother to babys record

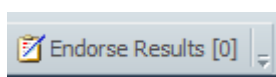

This allows you to open any related record ie Mother and Baby

This will Launch Scheduling Appointment Book

This allows reprinting of specimin labels

This allows you to endorse results from within the patient record
