

SETTING PATIENT LISTS TO SHOW INPATIENTS ONLY

1

To set up your patient list, so that it only shows current inpatients and not the recently discharged. First go to the patient list icon on the tool bar:

2

You will need to adjust your preferences to filter out all patients other than your current inpatients. Select the 'Properties' Icon: 

3

Click the discharge criteria option and select Only patients that have not been discharged

4

In the encounter types field, select inpatient and click OK:
